Fused Bamboo[®] for Exterior Use

3/4"x5-3/8"x72" 8 Square Foot Choose from 1 or 2 Grooved Edges

Bamboo Decking

Manufactured using two stages of high heat to first carbonize the bamboo, removing all of the starch and sugar, and then re-structure the bamboo, reinforcing its natural strength characteristics. It's then fused together using phenolic resin – the same resins used to make bowling balls. The result is an extremely dense, durable exterior-use product composed of 87% natural, fused strand bamboo fibers and 13% resin. Looks and acts much like other natural hardwood products, specifically Ipe hardwood.
