

## MARVIN WINDOWS AND DOORS VALUE THROUGH AND THROUGH

**MARVIN**   
Windows and Doors  
Built around you.®

## BUILT AROUND YOU®

We build windows and doors the only way they should be built. One at a time. Made to order. No shortcuts. Good enough is not good enough. It's this unwavering philosophy of doing it the right way that makes us who we are at Marvin Windows and Doors – from the moment we began back in 1912 right up through breakfast this morning. It pushes us to deliver uncompromising fit and finish. To capture classic details and historical design features. To tirelessly pursue more innovative design. To discover new ways of enhancing performance. And to create windows and doors that are truly built around you.

Discover what makes our windows and doors better.

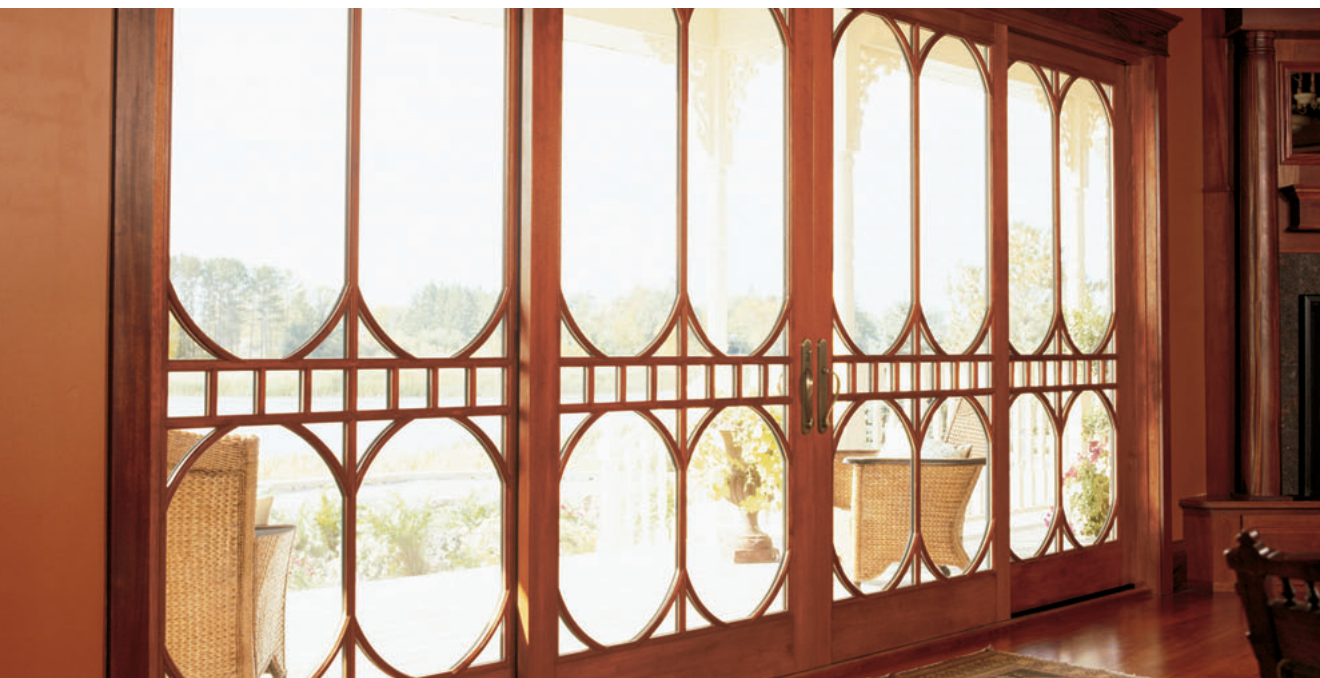

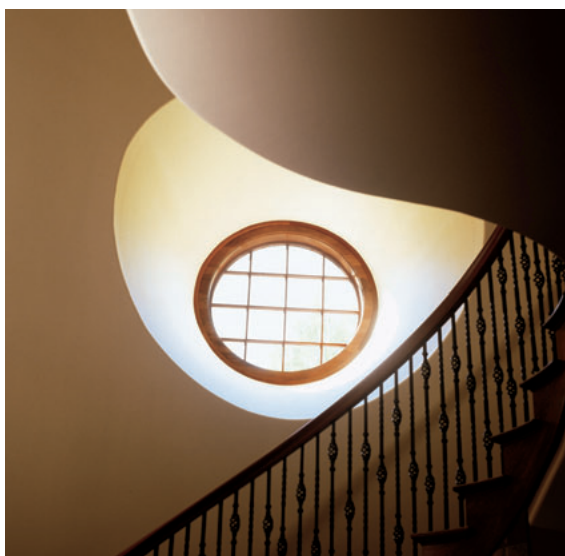

# 12

## REASONS WHY MARVIN WINDOWS AND DOORS ARE A **SUPERIOR** VALUE

1. Wide variety of standard configurations
2. Virtually unlimited custom capabilities
3. Performance over time
4. Exterior cladding made to last
5. Craftsman fit and finish
6. Real wood used throughout
7. Responsible practices
8. Innovative exclusive features
9. Energy efficiency options
10. Expert retail partners
11. Commercial-grade performance
12. Built around you®

## WIDEST VARIETY OF STANDARD CONFIGURATIONS

Unparalleled design flexibility, thanks to endless customization options. Start with one of our thousands of standard windows, sliding patio doors or swinging and sliding French doors.

## VIRTUALLY UNLIMITED CUSTOM CAPABILITIES

Unmatched design flexibility with 19 clad colors and 9 casing profiles to match any style. 7 interior wood species options. Multiple glass options. Endless divided lite patterns.

## PERFORMANCE OVER TIME

Engineered to perform over time – we stand behind our products and use the highest quality materials. Each window is crafted with real wood throughout. And our exteriors feature extruded aluminum cladding, all backed by Marvin's warranty.

## EXTERIOR CLADDING MADE TO LAST

Exterior extruded aluminum cladding is substantially stronger than roll-form aluminum. The difference in strength is similar to the difference in thickness of an industrial chair versus an inexpensive lawn chair. The 70% Kynar® 500 paint finish keeps colors strong and true as it resists chalking and fading. Cladding and finish together exceed the AAMA's toughest specification (2605) for aluminum cladding.

## CRAFTSMAN FIT AND FINISH

Marvin is renowned for craftsmanship and attention to detail. Our windows and doors strike the perfect aesthetic balance with beautiful profiles and shadowlines. The parts that make up a window, the stiles, rails, hardware and astragals all work together. The result is windows and doors that combine beauty with fit and finish.

## REAL WOOD USED THROUGHOUT

We use real wood throughout. No shortcuts. All of which brings beauty to your home and helps to increase thermal and energy efficiency. Choose from a wide variety of options:

White Oak, Cherry, Pine, Douglas Fir, Vertical Grain Douglas Fir, Cedro Macho, Mahogany.

### Signature Selections:

Maple, Black Walnut, Western Red Cedar.

## RESPONSIBLE PRACTICES

Marvin Windows and Doors are responsibly manufactured in the United States. As an industry leader in green practices, Marvin has introduced initiatives that rethink our business practices while lowering environmental impact. By implementing green practices, we help make producing beautiful windows and doors an environmentally friendlier process.

## INNOVATIVE EXCLUSIVE FEATURES

Some of the latest Marvin innovations include the revolutionary wash mode on our Ultimate Casement Collection that lets you easily clean both sides of windows from inside. Our Lift and Slide Door creates sweeping views up to 46 feet wide and 12 feet high. And our Low Profile Sill delivers unmatched performance and a flush transition between interior and exterior spaces.

## ENERGY EFFICIENCY OPTIONS

Energy efficiency is built into every product, with options that meet the needs of your climate. Virtually all Marvin products already meet or exceed federal ENERGY STAR guidelines. Marvin offers a variety of energy-efficient glass options including LoE<sup>2</sup>-272®, LoE<sup>3</sup>-366® and High-R Tripane.

## EXPERT RETAIL PARTNERS

Marvin retail partners are local window and door experts, which means your project is completed the right way. You get the peace of mind knowing your windows and doors are backed by the most knowledgeable and responsive experts in the industry. From exact measurements to advice on which window configuration would be right for your space, our retail partners are there throughout the process.

## COMMERCIAL-GRADE PERFORMANCE

Designed for durability and to minimize air and water infiltration. Many of our window and door products are certified to a DP rating of 50, and available with StormPlus® packages for more severe coastal environments. This means longevity and performance over time.

## BUILT AROUND YOU®

Our built-to-order process meets unique customer specifications to create one-of-a-kind windows and doors. And it's all backed by the industry's most knowledgeable and responsive experts.

## DOUBLE HUNG

- Features two sash that slide up and down
- Often found in traditional homes
- Marvin offers tilt mode for easy washing
- Features an all-wood interior
- Ultimate Double Hungs can be used for replacement or new construction
- Cost efficient replacement options include frame-in-frame and sash replacement systems

## CASEMENT

- Opens outward, like a book
- Available in both crank and push-out styles
- Excellent choice where egress (exit) is needed for building codes
- Marvin's hardware opens with fewer cranks and performs over time
- Exclusive wash mode lets you clean the outside of windows from inside the house
- Can be designed to simulate the look of a double hung

## AWNING

- Hinged on top
- Available in both crank and push-out styles
- Designed to circulate air without exposing your room to elements such as light rain
- Works well in combination with a large, fixed window or other casements and awnings

### VENTING PICTURE WINDOW

- An innovative alternative to traditional picture window choices
- Designed to open evenly on all sides
- Provides passive air exchange
- Mix and match with Marvin Casement and Awnings

### GLIDER

- Slides horizontally on the window track
- Solution for situations where a swinging window would get in the way – like overlooking a porch or a deck
- Simple and stylish

### BOW AND BAY

- Bay windows are made from angled windows
- Bow windows join to create a gentle curve
- Multiple Bay and Bow angle configurations are available
- Use Bows and Bays to create window seats

### ROUND TOP

- Offers a beautiful, distinctive look
- Adds elegance and individuality to your home
- Choose single window or multi-window assemblies
- Marvin offers thousands of different round top styles and sizes

### TILT TURN

- Popular European style
- Tilts inward or swings open like a door
- Can offer egress
- Can simulate look of a double hung

### SLIDING DOOR

- Choose from a traditional Ultimate Sliding French door or a more contemporary Sliding Patio door
- Brings in natural light and air
- Saves space
- Many Marvin doors offer unrivaled commercial-grade performance
- Exclusive concealed multi-point lock available

## SWINGING DOOR

- Classic look
- Graceful lines complement any decor
- Available in Arch Top styles
- Choose from inswing or outswing doors
- Engineered for long life and smooth operation
- Outswing Door may be ideal for areas with high traffic or limited interior space

## LIFT AND SLIDE

- Marvin's largest, most dramatic sliding door
- Available in sizes as large as 12 feet tall by 46 feet wide
- Comes in Pocket or Stacked configuration
- Exclusive flush-mounted hardware is unobtrusive, easy to operate

## RETRACTABLE SCREEN

- Simply pull the screen from side to side for easy operation
- Concealed system seamlessly blends in for beautiful views
- Installation friendly system – easy to remove, clean, paint or stain

## ARCHITECTURAL HARDWARE

- Marvin Architectural Hardware offers a collection of designer handles to complete our windows and doors
- Choose from a wide variety of architectural and design styles
- The hardware is engineered to fit and operate flawlessly

## CASINGS AND SUBSILLS

- Casing and subsills are a decorative covering for the area where the window joins the wall.
- Marvin casings are factory-applied; they give durable protection to your windows and add visual appeal.
- Choose from 19 colors or create a unique, custom color

The mark of  
responsible forestry

*Good for you. Good for our forests.™*

CERT #QMI-SFICOC-0046479

## FSC AND SFI

- Marvin has gained the coveted certifications of the Sustainable Forestry initiative® (SFI®) and the Forest Stewardship Council™ (FSC®)
- These independent, third-party organizations certify that the wood used in your windows and patio doors is responsibly grown and harvested

## MARVIN IS COMMITTED TO ENERGY EFFICIENCY

Our windows and doors aren't just beautiful – they can help save energy. Virtually all Marvin products already meet or exceed federal ENERGY STAR guidelines. At Marvin, we're always striving to meet the needs of an ever-changing environment. That's why we're

committed to building energy efficiency into product performance while bringing your inspiration to life. Marvin offers a variety of energy-efficient glass options including LoE<sup>2</sup>-272<sup>®</sup>, LoE<sup>3</sup>-366<sup>®</sup> and High-R Tripane so there is a glass option for any need.
